REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the overall claimed combination of a respiratory mask having a mask body and a headband for putting the mask to the face of wearer the mask body including three or more filter layers, each of said layers comprising an outer edge, the outer edges of the filter layers being joined together such that at least two enclosed volumes are created between adjacent ones of the layers and one or more spacers each positioned in a respective one of said at least two enclosed volumes so as to maintain a minimum spacing between the filter layers defining the enclosed volume, so that when air is discharged by said wearer, the spacers together with the filter layers provide a pumping effect to blow out carbon dioxide and to take in air from the surroundings for said wearer, is neither anticipated nor rendered obvious by the prior art of record.

2. Chang (6,742,518) teaches at least three filter layers (32,34,34) having at least two spacers (33) situated between the filter layers; however, there is no disclosure of the layers between joined at the outer edges and no disclosure of the filter layers conducting exhaled air from a wearer to the environment. Further, at least one of the filter layers (32) of Chang is expressly disclosed as being active carbon which is a known carbon dioxide absorber which teaches away from the mask of Chang being employed to conduct both inhaled and exhaled gas.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
